PROFESSIONAL SUMMARY

Recent Computer Science and Engineering graduate of Independent University, Bangladesh (IUB) with six months of undergraduate research experience and hands-on experience building and deploying AI-driven software end to end. Delivered a Django/PostgreSQL outcome-based education system now piloted at IUB, a production LLM web application (React, Django, Docker), and a MobileNetV2 medical-image classifier documented in an IEEE-style paper. Combines research rigor (PRISMA systematic review, technical writing) with practical engineering to ship working solutions. Seeking an entry-level Software Engineering or AI/ML role.

EDUCATION

Bachelor of Science in Computer Science and Engineering (CSE)
Independent University, Bangladesh (IUB)—School of Engineering, Technology and Sciences (SETS), Dhaka, Bangladesh

RESEARCH EXPERIENCE

Undergraduate Research Assistant (URA)
Independent University, Bangladesh (IUB) | April 2025 – October 2025
Supervisor: Asif Mahmood, PhD, Assistant Professor, Dept. of Computer Science and Engineering

- Appointed as a Research Assistant to design and build a Django and PostgreSQL system that automates CO/PO attainment calculation for outcome-based education (OBE) programs.
- Modeled the data linking students, grade sheets, and CO-PO mappings to generate individual and cohort-level attainment profiles.
- Delivered a working system that is now piloted at Independent University, Bangladesh.

TECHNICAL SKILLS

Programming Languages: Python (Main), Dart, C/C++, JavaScript, PHP, Shell Scripting.
Web & Mobile Development: Flutter, Django, HTML, CSS, REST API design.
AI & Machine Learning: TensorFlow, PyTorch, MobileNetV2, Transfer Learning, Computer Vision, K-Nearest Neighbors, Grad-CAM / Explainable AI.
Databases: PostgreSQL, MySQL, Supabase, Firebase, SQL, phpMyAdmin.
Tools & DevOps: Git, GitHub, Docker, VS Code, Antigravity, Linux/Ubuntu, VMware, Virtual box, XAMPP.
AI Tools: Cursor, Claude, Bohrium (For research), Perplexity (For research), Cline (As extension), Axiom, Runable, CodeX, Google Studio, Ox Alpha, Auto Draw, Demos, Atlas, Tesana, Also Ask, RuFlo, Microsoft Co-pilot, Loveable, Chatgpt, DeepSeek, Gemini, Grok.
Data & Analytics: Power BI, Microsoft Excel, Data Visualization.
IoT & Embedded Systems: Arduino, NodeMCU/ESP8266, DHT11, OLED (I2C), ThingSpeak.
Research Methods: Systematic Literature Review, PRISMA Methodology, IEEE-style Technical Writing.

PROJECTS

OBE Attainment Framework (Main Project and Research)
Django, PostgreSQL, Docker, Outcome-Based Education

- Designing and building a Django and PostgreSQL system to automate CO/PO (course outcome / program outcome) attainment calculation for students for open-credit university programs.
- Built the data model linking students, grade sheets, and CO-PO mappings to generate individual student attainment profiles for Cohort.
- The software is now piloted at **Independent University of Bangladesh**.

Clork AI — AI-Based Dialogue-to-TV-Series Identifier

React, Vite, Django, PostgreSQL, Supabase, OpenRouter API, Docker, Render

- Built and deployed a full-stack web application that uses a large language model, via the OpenRouter API, to identify TV series from user-submitted dialogue snippets.
- Developed the React/Vite frontend and Django backend, and managed application data using PostgreSQL and Supabase.
- Containerized the application with Docker and deployed it to production on Render, resolving frontend-backend integration and deployment configuration issues.

Dental Caries Classification from OPG X-Ray Images

Python, TensorFlow, MobileNetV2, Transfer Learning, Computer Vision

- Developed a transfer-learning pipeline using MobileNetV2 to classify dental caries in panoramic dental X-rays using the DENTEX dataset.
- Converted YOLO-format detection annotations into binary classification labels and applied resizing, normalization, and data augmentation.
- Evaluated model performance using accuracy, precision, recall, F1-score, AUC, confusion matrices, and ROC/Precision-Recall curves; presented findings as an IEEE-style paper.

AI-Based Deepfake and Digital Identity Fraud Detection

Systematic Literature Review, PRISMA Methodology, Flask, Explainable AI

- Conducted a systematic literature review of deepfake and digital identity fraud detection research published between 2022 and 2025, using the PRISMA methodology.
- Compared detection approaches, datasets, and evaluation methods across computer vision, multimodal detection, federated learning, and explainable AI.
- Designed a system architecture and implemented an early Flask-based prototype with JWT authentication, rate limiting, and Grad-CAM-based explainability.

Cross-Platform Mobile Application

Flutter, Dart, Git, GitHub

- Developed a multi-page mobile application with structured UI layouts, navigation, reusable widgets, and application-level state management.
- Managed source control using Git and GitHub with small, focused commits.

IoT Weather Monitoring System

NodeMCU, DHT11, OLED, ThingSpeak, Wokwi

- Built a weather-monitoring system using a NodeMCU and DHT11 sensor, displaying live readings on a 128x64 OLED display over I2C.
- Streamed sensor data to ThingSpeak for remote monitoring and visualization; validated circuit and microcontroller logic in Wokwi before hardware assembly.

Additional Projects

- E-Commerce Data Analytics Dashboard — Power BI dashboard analyzing sales and operational KPIs from a customized e-commerce dataset.
- Activity Tracker and Employee Management System — PHP, MySQL, and XAMPP application with role-based access for tracking employee activity.

- Fashion-MNIST Classification — K-Nearest Neighbors classifier benchmarked across multiple K values using accuracy and F1-score.
- Portable Audio Amplifier — TDA2009-based circuit with potentiometer-based volume control, tested and validated using an oscilloscope.

RELEVANT COURSEWORKS

Data Structures and Algorithms, Operating Systems, Computer Networks, Neural Networks, Artificial Intelligence, Machine Learning, Numerical Methods, Discrete Mathematics, Database Systems, Software Development

LANGUAGES

Bengali (Native), English (E2)
